

**Snack/Bin Programs (in classroom):**

**One bin per day:** The meals prepared would be how many snacks (2 items) were placed in the bin that day (regardless if they were all eaten or not). Add up these numbers for the month.

**One bin for multiple days:** The meals prepared would be how many snacks (2 items) were placed in the bin, but keep track of how many days the bin lasts before needing replenished. Add up these numbers for the month.

**Grab & Go:** The meals would be how many snacks were put out or prepared for that day, and not how many snacks were taken by the students. Add these numbers up for the month.
